HANDRAIL SYSTEMS

**THIS
CHANGES
EVERYTHING.**

Get ready for game-changing advances in looks, versatility, ease of installation, and speed. Sleek, sexy simplicity that performs like no other, Promenaïd handrails are ADA, Commercial and Residential Code compliant. They respond to your vision with modular components that connect flawlessly in endless configurations. Promenaïd puts innovation in the hands of architects and builders.

HANG ON, IT'S GOING TO BE A BEAUTIFUL RIDE.

Designed for greater architectural creativity, Promenaid handrails are a beautiful finishing touch to buildings of all sizes and styles. Elegant lines, attractive curves, and high-end materials blend with every décor and enhance any space, inside or outside.

Promenaid handrails come in an array of satin-anodized aluminum finishes or TrueWood™ never-warping aluminum railing wrapped in the warmth of real oak or walnut.

THINK FAST.

Modular components and simple mounting technology slash installation time. Gone are the pains of welding, gluing, or custom fabricating. With adjustable bends and brackets that lock in place in an instant, Promenaid handrails require no special tools or training, even on the largest projects. And with deliveries in as little as 48 hours, Promenaid redefines lead times.

IMAGINE THE POSSIBILITIES.

At Promenaid, we've rethought everything to create a handrail system that's as simple as it is seamless, offering limitless design possibilities.

BRACE YOURSELF. OUR BRACKETS ARE REVOLUTIONARY.

Add them, remove them, or reposition them anytime, anywhere. Then clamp them in place in the handrail channel in seconds, no drilling required. Promenaid brackets easily align with wall studs and support up to 500 lbs. each.

BENDS TO YOUR WHIMS.

Smooth and beautiful, Promenaid adjustable bends ensure uninterrupted form for a new level of design continuity. Customize the look you want on-site without welding or pipe bending. With Sprocketlock™ technology, you can create curves in any configuration that lock solid with the twist of an Allen key.

STRAIGHT-UP AMAZING.

Promenaid posts mount vertically with no shimming, even on ramps and slopes. The Sprocketlock™ Post Base is the world's first that pivots to offset ramp inclines or sloped surfaces and, yes, locks firmly in place.

INNOVATION LIGHTS THE WAY.

Promenaid handrails truly shine with optional integrated LED lighting. Elegant and weatherproof, Channelux™ dimmable high-intensity modules install easily wherever you want them. Thanks to Promenaid's patented full-length channel, they fit flush and wire up in minutes without drilling or fishing.

Instantly Customizable Designer Handrail Keeps Construction on Schedule

The design-build process requires creativity, ingenuity, and flexibility to be successful. The MLK, a mixed-use multifamily project in Austin, Texas, was no exception.

When the modular walls arrived with blocking that didn't match the planned bracket positioning, the challenge became to replace the specified handrails without delaying construction. KRDB needed a system that would meet the designer's style expectations, possess the versatility to adapt on the fly to irregularities on the job site, and be delivered fast enough to keep the work on schedule.

"There are some nice handrails out there, but most are so complicated they're really expensive to install. We needed a system that had movable brackets, looked good, and didn't cost a mint. Promenaïd delivered what the competition couldn't."

-Senior Project Manager, KRDB

Promenaïd handrails fit the bill. With beautiful styling, flexibility to quickly reposition brackets to match any stud spacing, easy installation, and delivery in days, the team's buy-in was a simple one. Problem solved.
